

METHOD AND SYSTEM FOR ANALYZING CONTENT ON A WEB PAGE  
USING AN EMBEDDED FILTER

ABSTRACT OF THE DISCLOSURE

5           A method for analyzing content on a web page. In one method  
embodiment, the present invention accesses a web page having content.  
Additionally, the web page is processed through a filter wherein the filter  
transfers the content of the web page to an analyzer. The analyzer analyzes the  
content of the web page. The analyzer then returns the result of the analyzing  
10 to the server which appends the result of the analyzing to the content of the  
web page. The results are then displayed on the web page. In so doing, the  
ability to provide an analysis of the functionality of a web page at the time of  
development is provided.
